

Annexe 1 : résumé du film à découper et mélanger. Les élèves remettent dans l'ordre.

E. Vincent Freeman is conceived without the aid of genetic selection; he's supposed to live only 30.2 years because he was born with a heart defect. So Vincent's parents use genetic selection to give birth to their next child, Anton.

I. Growing up, the two brothers often play a game of "chicken"(swimming the farthest in the sea); Vincent always loses. Vincent dreams of a career in space travel but is reminded of his genetic inferiority.

O. One day Vincent challenges Anton to a game of chicken and wins. Vincent saves Anton and then leaves home.

D. Years later, Vincent works as an "in-valid", cleaning the offices of Gattaca Aerospace Corporation. He reads a lot of books about space travel and trains a lot to have a good physical condition.

F. He meets Jerome Eugene Morrow, a former swimming star who won only a silver medal. Vincent becomes Jerome, a "valid". He becomes Gattaca's best celestial navigator. He's supposed to leave for Saturn's moon Titan.

G. A week before the mission, the mission director is murdered. The police finds Vincent's "in-valid" eyelash.

H. Irene takes Vincent's hair on his hairbrush to analyse (but it is in fact Jerome's hair). Jerome admits that the reason for his paralysis is not a car accident but a suicide attempt.

J. Vincent and Irene meet on a roof. She confesses that, even though she's a "valid", she has a heart defect. They kiss.

K. Vincent learns that the police found his eyelash and that he's wanted by the police. He wants to give up everything but Jerome convinces him to continue.

C. Vincent and Irene go to a piano concert. The police check their identity, Vincent takes off his lenses.

M. Gattaca's employees have to do a blood test. Vincent succeeds in replacing his blood with Jerome's. They don't know he's Vincent.

L. There is a police raid in a bar. Vincent and Irene escape. They spend the night together. Vincent wakes up and goes swimming in the sea.

B. In Gattaca, a policeman is looking for Vincent. Irene warns him. Vincent warns Jerome. Jerome climbs up his stairs. Jerome has to do a blood test. Vincent explains his true identity to Irene. She runs away, frightened.

N. The real murderer is confounded. It was Gattaca's director. We understand that the policeman is Vincent's brother: Anton. They play their old game, Vincent wins and saves his brother. Irene accepts Vincent's true identity.

A. The day of the launch arrives. Jerome says that he has stored enough genetic samples to last Vincent two lifetimes. They say goodbye. Vincent is stopped for an unexpected DNA test. The test shows that Vincent is an "in-valid" but the doctor has known all along and alters the test to allow him to go anyway. The shuttle lifts off, Jerome commits suicide inside his home incinerator. His silver medal turns gold in the flames.
